

### Directions

The Great Flood of 1927 affected an area of 27,000 square miles. Find Greenville, MS on the map and using a compass draw a circle with a radius of about 100 miles around it. Color this area blue.

Next, color in the states of Massachusetts, Connecticut, New Hampshire, and Vermont using black. If you combine the area of all four states it is equal to 27,000 square miles.

Outline Maps Copyright Houghton Mifflin Company.

List three things that would be affected by such a big flood:
